MEMORANDUM FOR: Deputy Director of Central Intelligence

VIA: Deputy Director [REDACTED]

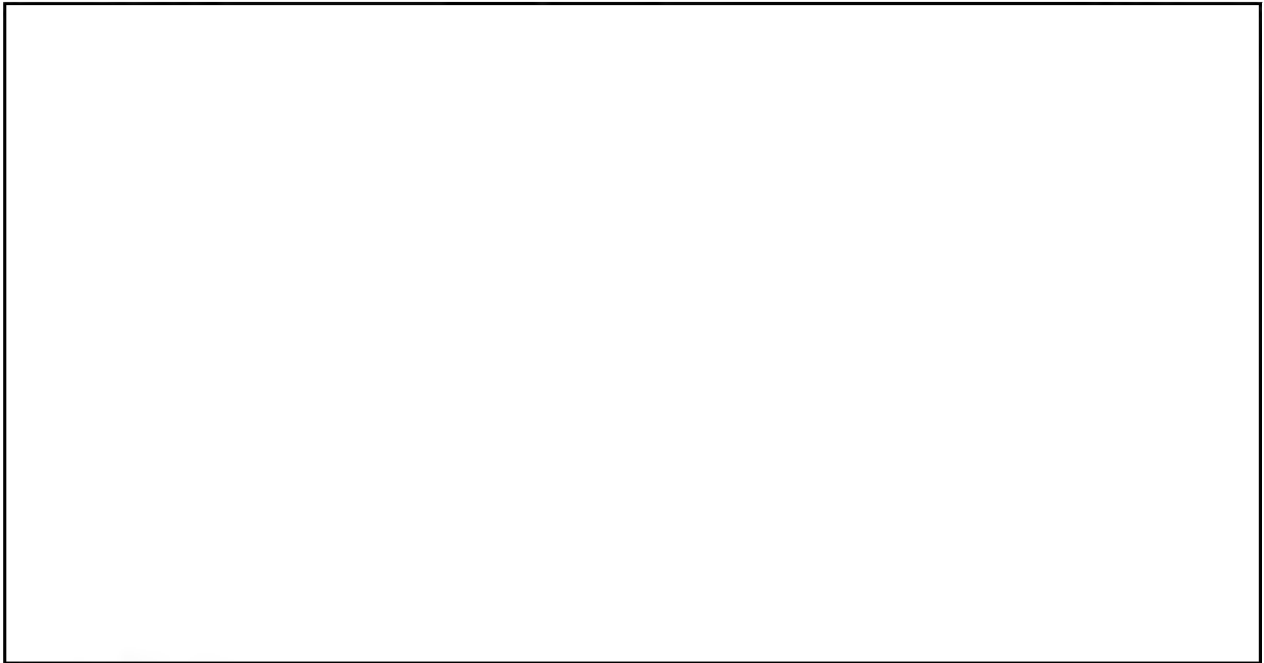

SUBJECT: [REDACTED] Munich Meeting on
Broadcasting Effectiveness

1. This memorandum contains a recommendation submitted for DDCI approval. Such recommendation is contained in paragraph 2.

2. I think the meeting in Munich this year to discuss the effectiveness of US broadcasting to the USSR and European satellites is particularly significant, and especially so in the light of shifting Soviet tactics. It is very necessary, then, that we make the most of this opportunity to take a hard look at both program techniques and evaluation procedures with long range considerations in mind.

My dear General Cabell:

A meeting will be held in Germany again this year on effectiveness of U.S. broadcasting to the USSR and European Satellites. As you are probably aware, similar meetings were held the last two years in Berlin under the chairmanship of Wilbur Schramm. He will again act as chairman, but this year the meeting is scheduled for August 13-17 in Munich rather than Berlin.

As in past years, the Department of State at our behest has again requested that representatives from the orbit posts, the peripheral offices, and others concerned from Western Europe attend the meeting. Also attending will be representatives from USIA, RFE, RLlib, and, I believe, OCB, and EE and OIR in State Department.

This year we plan, rather than devoting the entire meeting to a discussion of actual effectiveness itself, to place substantial emphasis on exploring ways and means of getting more and better information on effectiveness from the Embassies, peripheral units, etc., and on how such information can be better analyzed, compared, and utilized by the broadcasters and other offices concerned.

Sincerely,

Henry Loomis

Dear Mr. Louis:

I have read with interest your suggestion that part of the proposed meeting with Mr. Schramm in Munich be devoted to the question of improving our methods of obtaining more and better information on the effectiveness of international broadcasting.

The officers in CIA responsible for the evaluation of technical effectiveness have felt that, although the present system produces much valuable information, there are large gaps in our intelligence on the subject.
